

To support Company growth and ensure production proceeds smoothly and in a timely manner, we at *metabion* are looking to welcome a:

## Quality Manager (f/m/d)

We are constantly looking for new talents and welcome unsolicited applications

*metabion* is a globally leading supplier of Custom Nucleic Acids renowned for its focus on reliable supplies of consistently high-quality products and services. Our vision is to be the best-in-class producer and service provider of premium custom oligonucleotides – dedicated to enhance scientific progress and to support diagnostic and therapeutic solutions. *metabion's* aspiration is to ensure that quality is primary while trust is principle in its relationships with all stakeholders. We are committed to deliver excellence to biotechnological research and applications to promote creativity, innovation and progress for the well-being of our planet – its human and natural resources.

### Duties include:

- Establish, implement and maintain metabion's quality procedures, standards and specifications, making sure that manufacturing/production processes meet international and national standards.
- Plan, organize and carry out internal audits to verify the conformity of metabion's quality management system to the ISO requirements and if it is effectively implemented and maintained.
- Support to plan, prepare and coordinate the external annual audit by a certified body and sustain metabion's ISO certification and to acquire (c)GMP certification level for a defined production unit.
- Plan, organize and carry out supplier audits to ensure metabion's quality and regulatory requirements to purchased products and services
- Cooperate closely with Procurement for qualification of new suppliers
- Promote a quality culture and support continuous improvement.
- Ensure that all major activities/ systems/ procedures are well documented and being consequently updated so as to reflect changes/ modifications in procedures & processes by SOP's in each department/functional activity.

### Your Profile

- Degree in chemistry, biology, biotechnology or comparable qualification.
- Relevant professional experience in quality management, ideally in the biotechnology or pharmaceutical industry.
- Knowledge of GMP regulations and industry practice is a plus
- Analytical and problem-solving thinking

### What you can expect

- In-depth training to maximize your professional development.
- Innovative and diversified work and work environment.
- Familial company culture with flat hierarchies in a future-oriented, globally active, and prosperous and best-in-class company.
- Secure job in a crisis-tested industry.
- Opportunity to "make a difference", be creative, and grow in and with an inspiring team around.
- Company events, company health management, company pension scheme.

We provide a safe, clean, fair and respectful, prosperous and healthy work environment, where people are inspired and successful. *metabion* is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, or age.

If you have the skills and qualifications for this position, please send us your details (application letter, curriculum vitae, references, certificates and salary expectation) to [careers@metabion.com](mailto:careers@metabion.com)
